Our Clients

“Going above and beyond involves making customers “feel special” and helping them out even when it may not make sense.” ~ Neil Patel

Problem

Commodity Business

Governments Agri programs run at various level are executed in silos

No technology support to track quality of grains and do sample management

Lack of collaboration between warehouses and transport

Lack of visibility of available storage spaces(warehouses) leading to wastage and spoilage

Imbalance between Demand & Supply due to wastage, leading to imports

Lack of pre-planning and coordination between, processors, distributors, traders and government

Solution | Commodity Business

Real-time monitoring of government programs at a regional level

End-to-end traceability of farmer produce

Proper forecasting of end customer demand, delivery time and inventory preventing bullwhip effect

Improving farmer linkages within the ecosystem

Guaranteed benefits to all farmers
